Beginner

WEB DEVELOPER Former Executive Chef transitioned into web development.

I leverage creativity & precision from extensive culinary experience to develop innovative, ad hoc, web solutions. Proficiency in React, JavaScript(ES6), HTML & CSS (MERN stack), I am also dedicated to continuous learning and excellence. Having a strategic mindset, I thrive in dynamic & fast-paced environments.

PROJECTS

GROOVEGRID

January 2024

- Dynamic web [app](#) enhancing the music listening experience by enabling users to explore musical genres, discover artists, and curate personalised playlists. GrooveGrid integrates user authentication for a tailored experience, offering detailed insights into songs, albums, and artist discographies.

Tech Stack: JavaScript(ES6), React.js, Node.js, MongoDB, Express, CSS3, HTML5, GitHub

HERO COMPARE

December 2023 – January 2024

- Sleek single-page [app](#) that offers detailed comparisons of heroes from League of Legends and Dota 2. Utilising API calls, it provides essential information on roles, abilities, and difficulty levels. The filtering tool makes this application a perfect guide for MOBA newcomers to select their ideal character

Tech Stack: JavaScript(ES6), React.js, HTML, CSS, API Development, Databases, Node.js

POKEADVENTURE

November 2023 – December 2023

- Engaging browser-based game, where players maneuver a character through a river filled with obstacles. Accumulate points by adeptly dodging obstacles and achieve high scores or endure until all lives are expended

Tech Stack: JavaScript(ES6), React.js, HTML, and CSS

PROFESSIONAL EXPERIENCE
