SUMMARY

I am an ambitious, hardworking, and seasoned data engineer with proficiency in data analysis. I am skilled in data collection, visualization and data analysis. My 6years of extensive experience as a public health expert brings a unique blend to data interpretation and analysis which enables organizations make a right, unique and informed decision for organizational growth. Through my work in public health, I have realized the immense potential of data-driven decision-making in improving population health outcomes and this experience has fostered my strong analytical and problem-solving skills.

I believe that my background in public health, combined with my newly acquired technical skills, positions me well for a successful transition into the field of data science. I am confident that my strong analytical mindset, attention to detail, and ability to collaborate effectively with multidisciplinary teams will enable me to excel in the team. I am eager to leverage my expertise in data analysis and my understanding of public health challenges contributing to your organization's mission of utilizing data to drive innovation and impact.

Furthermore, I am excited about the opportunity to join and contribute to the team. I am confident that my unique combination of skills, along with my adaptability and passion for continuous learning, will make me a valuable asset. I am ready to embrace new challenges, learn new technologies, and contribute to the growth and success of the organization.

EXPERIENCE

Consultant

11/2022 - 02/2023

KIT Royal Tropical Institute

Amsterdam
