## SUMMARY

I have been living in the Netherlands with my family since January 2020. During the corona period, I focused on learning Dutch and also focused on improving my skills in data science. I am currently in B1 level in Dutch and I speak Dutch mostly in my daily life. Since I have been studying statistics at the university, I'm willing to improve myself in data science and data engineering. I am open to job opportunities related to data engineering, data analysis and data reporting.
