Haarlem

I am a full-stack web developer with a civil engineering background. I bring a track record of project management and intricate problem-solving. I realized that problem-solving, quick learning, and the digital world were what I liked the most. This career transition signifies not only my eagerness to learn but also my determination as a web developer who bridges the worlds of engineering and technology.

Projects

Sharing Store (Cloth donation website)

CSS, Javascript, Node, Express, Handlebars, Cloth donation platform

<https://github.com/didemydn/Project-module2-website>
